Leninski pr., 14
Moscow, U.S.S.R.

Dear Sir:

This is to request an extension of the stay of V.A. Shvets in my laboratory and in the United States until June 26, 1975.

The main reason for this request is to permit V.A. Shvets to attend the meeting in Princeton, New Jersey of a number of principal investigators in the U.S.-U.S.S.R. exchange program on chemical catalysis.

But there are added benefits for such an extension of stay. The first part of the visit of V.A. Shvets in my laboratory is over. During this past period, Dr. Shvets has worked very hard and quite successfully on an ester problem involving his expertise. During the next period, he will be able to look around my laboratory and other laboratories at Stanford to broaden his outlook and learn about new techniques.

Finally, the extra time at the end of his stay will permit Dr. Shvets to spend two weeks in Professor Hall's laboratory in Milwaukee without shortening his useful time at Stanford.

Sincerely yours,

M. Boudart
